EDUCATION

- Shri Vishnu Engineering College for Women** Bhimavaram, India
Bachelor of Technology - Computer Science and Engineering (AI and DS); CGPA: 9.37 September 2023 - Present
- Rajiv Gandhi University of Knowledge Technologies** Nuzvid
Pre-University Course; CGPA: 9.86 December 2021 - August 2023
- Z.P.P. High School Battelanka** East Godavari
Secondary Education — Marks: 594/600 2021

TECHNICAL SKILLS

- Programming Languages:** C, Python (Pygame, NumPy, Pandas), Java, Elixir, Rust, Phoenix Framework, HTML, CSS
- Tools, Platforms, and OS:** Git, GitHub, GitLab, Visual Studio Code, LaTeX, Linux
- Soft Skills:** Problem Solving, Communication, Adaptability, Leadership, Public Speaking
- Languages:** English, Hindi, Telugu, Japanese (Basic)

PROJECTS

- Git Clone using Rust:** - Software Development December 2024
Tech Stack: Rust, Cargo [GitLab](#)
Overview: Implemented a Git clone functionality in Rust, featuring basic version control operations. Focused on performance optimization and memory safety.
Contribution: Developed core clone functionality and implemented efficient file handling mechanisms.
- Report Lost-Found Platform:** - Web Development October 2024 - Present
Tech Stack: Elixir, Phoenix Framework, PostgreSQL [GitLab](#)
Overview: Developed a full-stack lost and found items management platform using Phoenix Framework. Implemented real-time updates, user authentication, and an interactive item reporting system.
Contribution: Built the entire application architecture and implemented real-time features using Phoenix channels.
- PDF to Audiobook App:** - Software Development November 2024
Tech Stack: Python (pyttsx3, PyPDF2, Flask), JavaScript, HTML, CSS [GitLab](#)
Overview: Built a web-based app that transforms PDFs into audiobooks, with features like play, pause, and page navigation for a smooth user experience.
Contribution: Developed text-to-speech functionality and user interface controls.

ACHIEVEMENTS

- Google Women Engineer Scholar (Top 200 Selection):** Selected among 30,000 applicants (0.6% acceptance rate) for a scholarship and full fee waiver for a 24-month mentorship program (Google - TalentSprint).
 - Focused on developing technical and corporate skills for women engineers, with networking opportunities with industry leaders and fellow scholars.
 - Participated in a week-long Google Immersion Program, which included:
- Infosys Pragati: Path to Future Trainee:** : Selected for a 12-week career development program aimed at personal and professional growth for women.
 - Included mentorship sessions, skill development workshops, and opportunities to enhance technical and leadership capabilities.
 - Prepared participants for a successful career in technology.

CERTIFICATIONS

- Basics of Python:** - Infosys Springboard November 2023
- Arduino Unplugged Workshop:** - IEEE September 2024
- Programming using Java:** - Infosys Springboard July - September 2024
- Introduction to Data Science:** - Infosys Springboard September 2024

WORKSHOPS AND BOOTCAMPs

- 3-Week Offline Bootcamp:** :Completed an intensive training program on technical skills, including Git, GitLab, Linux, OOP Basics, Cryptography, Pelican, and other industry-ready skills.
- IET Workshop on Git and GitHub:** : Gained hands-on experience in version control and containerization technologies, enhancing my ability to manage software development projects effectively.
- Arduino Unplugged Workshop:** : Learned about Arduino and sensors for data collection, focusing on applications in machine learning and AI-based projects.
